United States Patent 5,910,181, which matured from United States Patent Application Serial Number 08/964,236, is partly inoperative or invalid by reason of claiming less than I had a right to claim based on the disclosure of the patent application. The patent application disclosure does not limit the invention to a synchronous dynamic random access memory but discloses the invention as pertaining to other kinds of random access memory particularly as described at column 13, lines 62-65 of United States Patent 5,910,181. In addition, minor errors of a grammatical or typographical nature appear in claims 1-3, 5, 6, 7, and 9 of U. S. Patent 5,910,181.

To the best of my knowledge, the errors occurred without deceptive intent. Correction of the errors is sought by correcting claims 1-3, 5, 6, 7, and 9 and by adding claims 10-18 as shown in the attached papers.

As a named inventor, I hereby appoint Leydig, Voit & Mayer to prosecute this application and transact all business in the Patent and Trademark Office connected therewith: Customer Number 23548.

I further direct that correspondence concerning this application be directed to Leydig, Voit & Mayer: Customer Number 23548.

I declare that all statements made here based on my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful, false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful, false statements may jeopardize the validity of this reissue patent application or any reissued patent issuing from this application.
